

Innovative "Green" Dry-Fall Coatings to Protect Your Future Project Profile: **LBM Quarry in Sapphire, NC**

Painted with:
Highland 485-C Dry-Fall 2-K Epoxy DTM (Direct to Metal Coating)
Low VOC: 100 or 340 g/L HAPs Free

The **LBM Quarry in Sapphire, NC** is a very busy place with more than 100 trucks per day coming in. In addition there is quarry equipment, employee parking, a Ready Mix Plant and Hot Mix Asphalt Plant on site. Paint overspray damage was a major concern since they planned to paint the facility during normal business hours.

Highland 485C Dry-Fall 2-K Epoxy DTM Coating is resilient, hard-wearing and made for hostile environments such as this quarry. Paint overspray is powder dry within 10-20 feet from point of application and enables quick spray application without overspray damage. It may be applied over tightly bonded rust or mill scale and offers outstanding chemical, water, weathering and corrosion protection. In moderate conditions such as this quarry 4-6 mils DFT will provide very good corrosion protection. For maximum protection even in severe chemical or atmospheric conditions, it can be applied up to 6-10 mils DFT.

LBM Quarry Manager, Kenny Queen said: ***"There are a lot of customer trucks coming in and out and employee parking areas for all three businesses located in the quarry. It is so nice to use high quality epoxy paint and not have to worry about overspray damaging anyone's vehicles or equipment during normal hours of operation."***

LBM Industries Vice President Mack McNeely said: ***"The service and support we received from everyone at Highland International, from the sales team to the shipping department, has been top notch."***

- Highland Dry-Fall High Performance Solvent-Borne Paint is 3-4 times longer lasting than conventional alkyd and water-borne paint!
- Spray application is up to 4 times faster to apply than brush and roll paint application saving time and money! Don't worry about paint overspray. . . it wipes off clean without chemicals or buffing.
- Dry-Fall is also available in HiTemp coatings - from ambient to 1300°F.
- Maximum Corrosion and UV Protection! Low VOC & HAPs Free Dry-Fall Paint.
